What is The *b-Calm*TM

b-CalmTM is a personal audio system specially designed to relieve dental patients of noise from a variety of handpieces as well as promote a calm and relaxed mind.

*b-Calm*TM utilizes in-the-ear earphones to execute the *AudioSedation* technology; a proprietary blend of noise-mitigating signals optimized within the calming sounds of nature. By using the *b-Calm*TM system, not only is the severity of the drill noise mitigated, but the patient is provided with a calming and relaxed audio environment. The *b-Calm*TM system puts the patient back in control of their dental experience, all in the palm of their hand.

*b-Calm*TM Testimonials

Patients.....

“On a scale from 1 to 10, this dental experience was a 10 1/2. Not only would I request this again, I would buy one.”

Dr. Mary, MD

“Using the b-Calm system, my appointment seemed much shorter.”

Gene, Cedar Falls

Practitioners.....

“I actually had a patient refuse a treatment because the b-Calm system was not available for her.”

Dr. Budke, DDS

“My patients like the audio tracks and appreciate the simplicity of the product.”

Dr. Bob, DDS

“This is the most cost-effective product I have found to provide comfort to my patients - every office should have one.”

Dr. Adams, DDS

Earphone Tips

Custom, replaceable tip design promotes good Hygiene. Made from soft and comfortable material.

Earphones

Comfortable Fit with Exceptional Audio Quality.

User Interface

Simple touchpad layout provides optimum ease of use. Raised volume pads empower the patient with immediate control over the system.

Control Unit

Made from tough and durable ABS material. The smooth handheld surface is easy to clean and promotes good Hygiene. The ergonomic design provides a universal fit among patients.

Hygienic sleeves available for added patient protection

AudioSedation Technology

Proprietary blend of noise-mitigating signals optimized within the calming sounds of nature. Multiple audio tracks allow the patient to select their preferred sounds.
