

## Practice Management System

*Bringing Peace to Your Patients' Minds*

### Welcome to **b-Calm**<sup>TM</sup> .....the latest breakthrough in Patient Care.

Inspired by a practicing Dentist of over 35 years, the **b-Calm**<sup>TM</sup> Practice Management System has been developed to fulfill a long-awaited need in the industry. After many years of constantly listening to fears and apprehension induced by the noise of drills and other hand pieces, an effective solution now exists for your patient — and they deserve it. Having received strong approval from patients, the **b-Calm**<sup>TM</sup> Practice Management System has also received a two-thumbs-up from Practicing and Academic Professionals.

The **b-Calm**<sup>TM</sup> Practice Management System sets a new standard and expectation in caring for your patients. By providing your patients with a system for noise relief and relaxation, your patients develop a state of calmness — ultimately improving the experience at the Dentist and promoting regular visits.

The **b-Calm**<sup>TM</sup> system is a simple, easy-to-use handheld audio device which utilizes in-the-ear earphones to execute the **AudioSedation** technology. The **AudioSedation** technology is a proprietary blend of noise-mitigating signals optimized within the calming sounds of nature. By using the **b-Calm**<sup>TM</sup> system, not only is the severity of the drill noise mitigated, but the patient is provided with a calming and relaxed environment. The **b-Calm**<sup>TM</sup> system puts the patient back in control of their dental experience, all in the palm of their hand.
